

# DBMS Project

## Hotel service

Teacher : Perizar Yesenova

### **PROJECT BY**

Alikhan Nurraddinov, Zhumadilla  
Nurdaulet, Galym Yessenbay

## END USERS

We don't have an end user  
We always work around the clock and do not stop

## EASY TO UNDERSTAND

A guest comes and we need to serve him (her).

## DATA OBSOLESCENCE BE HANDLED

We have a database that saves all guests and their services, their food is all saved in the database. If our guests leave, they remain with us in the archive.

# HOTEL DBMS

# WHERE DID YOU GET THE IDEA FOR THIS PROJECT?

WE TOOK THIS IDEA FROM THE BRAIN. WE HAD A GOAL, NOT A DREAM. ALL THESE DATABASES NEED TO BE WORKED ON AS IN A PROFESSIONAL. NOW YOU SEE IT PROFESSIONALLY OR NOT. WE TRIED SO HARD. AND WE DREAMED THAT WE HAVE A HOTEL AND HOW WE NEED TO CONTROL IT. ALL THIS IS THE WORK OF OUR DREAMS. WE WERE NOT AT THE HOTEL. BUT WE HAVE OUR OWN PROJECT FOR THE HOTEL. WELL, LET'S SEE, LET'S GET STARTED.
